ATTENTION

CORTISONE / PREDNISON PATIENT

Mr/Mrs/Miss:

Address:

Born on:

takes

per day on account of

In case of a stress situation like an accident, infection or fracture, it is necessary to at least double (and sometimes triple) the substitution dose (if indicated by intramuscular or intravenous injection).

In case of vomiting or shock, or when surgery is required, intravenous administration of either hydrocortisone succinate, prednisolone succinate or dexamethasone phosphate is required.

Please contact the endocrinologist on call when advice is needed.
